CONTENTS OF VOLUME 119

NUMBER 1, 22 NOVEMBER 1987

SUN, C. T. and LIOU, W. J., A three-dimensional hybrid-stress finite element formulation for free vibrations of laminated composite plates . . . 1

BRUNEAU, A. M., BRUNEAU, M., HERZOG, PH. and KERGOMARD, J., Boundary layer attenuation of higher order modes in waveguides 15

NG, S. S. F. and KAUL, V., Free vibration analysis of continuous orthotropic bridge decks 29

CHIRINGHELLI, G. L., LANZ, M. and MANTEGAZZA, P., A comparison of methods used for the identification of flutter from experimental data . . . 39

FARASSAT, F., PADULA, S. L. and DUNN, M. H., Advanced turboprop noise prediction based on recent theoretical results 53

GLADWELL, G. M. L., ENGLAND, A. H. and WANG, D., Examples of reconstruction of an Euler–Bernoulli beam from spectral data 81

NAYFEH, A. H., Parametric excitation of two internally resonant oscillators . 95

SOLDATOS, K. P., Influence of thickness shear deformation on free vibrations of rectangular plates, cylindrical panels and cylinders of antisymmetric angle-ply construction 111

ERCOLI, L., HERRERA, R., SEGUI, D. and ALVAREZ, S., Analytical and experimental determination of natural frequencies of double-span beams of non-uniform cross-section and with elastic end constraints 139

ORABI, I. I. and AHMADI, G., An iterative method for non-stationary response analysis of non-linear random systems 145

KORULSKI, Z. and SOBCZYK, K., Effects of parameter uncertainty on the response of vibratory systems to random excitation 159

Letters to the Editor

MAURIZI, M. J. and BAMBILL DE ROSSIT, D. V., Free vibration of a clamped beam with an intermediate elastic support 173

LIU, W. H. and HUANG, C.-C., Free vibration of a rectangular plate with elastically restrained and free edges 177

TABARROK, B. and FENTON, R. G., Authors' reply 183

MALHOTRA, S. K., GANESAN, N. and VELUSWAMI, M. A., Vibrations of orthotropic square plates having variable thickness (parabolic variation) . . . 184

NUMBER 2, 8 DECEMBER 1987

AKSU, G. and AL-KAABI, S. A., Free vibration analysis of Mindlin plates with linearly varying thickness 189

ZHANG, R. and ZHU, B., Normal mode sound field of a directional radiator . 207

ZHANG, R. and JIN, G., Normal-mode theory of average reverberation intensity in shallow water 215

CHEN, G., Applications of a generalized Galerkin's method to non-linear oscillations of two-degree-of-freedom systems 225

PERRIN, R. and CHARNLEY, T., On the RIR modes of the modern English church bell 243

BAUER, H. F., Hydroelastic oscillations of aviscous infinitely long liquid column 249

GLADWELL, G. M. L. and DODS, S. R. A., Examples of reconstruction of vibrating rods from spectral data 267

PRITCHARD, J. and ADELMAN, H. M., Sensitivity analysis and optimization of nodal point placement for vibration reduction 277

KAGAWA, Y., YAMABUCHI, T., WATANABE, N. and MIZOGUCHI, T., Finite element cochlear models and their steady state response 291

BERT, C. W., Application of a version of the Rayleigh technique to problems of bars, beams, columns, membranes, and plates 317

BAO, X. and KAGAWA, Y., A simulation of condenser microphones in free field by boundary element approach 327

SINGH, V. P., UPADHYAY, P. C. and KISHOR, B., A comparison of thick and thin shell theory results for buried orthotropic cylindrical shells 339

ALAM, N. and ASNANI, N. T., Refined vibration and damping analysis of multi-layered rectangular plates 347

NAMACHIVAYA, N. S., Stochastic stability of a gyropendulum under random vertical support excitation 363

Letters to the Editor

FILIPICH, C. P., Modelling the dynamic behaviour of a portal frame by means of springs of non-linear characteristics supporting an elastic beam . . 375

LIU, W. H. and YEH, F.-H., Vibrations of non-uniform rotating beams . . 379

LY, B. L., A vibrational method of undetermined parameters for bending of rectangular plates 385

NUMBER 3, 22 DECEMBER 1987

KAREEM, A. and SUN, W.-J., Stochastic response of structures with fluid-containing appendages 389

YU, R.-C. and MOTE, JR, C. D., Vibration and parametric excitation in asymmetric circular plates under moving loads 409

CHEN, W.-H. and FAN, C. N., Stability analysis with lumped mass and friction effects in elastically supported pipes conveying fluid 429

DOKUMACI, E., An exact solution for coupled bending and torsion vibrations of uniform beams having single cross-sectional symmetry 443

MARK, W. D., Effects of intensity modulations on the power spectra of random processes 451

SIMO, J. C. and VU-QUOC, L., The role of non-linear theories in transient dynamic analysis of flexible structures 487

MINOTA, T. and KAMBE, T., Acoustic waves emitted by a vortex ring passing near a circular cylinder 509

LEE, C. H. and BYRNE, K. P., Impact statistics for a simple random rattling system 529

YANG, I. H. and SHIEH, J. A., Vibrations of initially stressed thick, rectangular orthotropic plates 545

Letters to the Editor

ERCOULI, L., LAURA, P. A. A. and DE NATALINI, L. B., Critical velocities of shafts of non-uniform cross-section 559

TOHYAMA, M. and SUZUKI, A., Active power minimization of a sound source in a closed space 562

DUNCAN, J. H., A comparison of wave propagation on the surfaces of simple membrane walls and elastic coatings bounded by a fluid flow 565

ANNOUNCEMENTS 575
